Tübingen, 2nd October 2017

Dear Professor Romanov,

on the basis of your work on *enveloping semigroups and weak* mean ergodicity* it is my pleasure to invite you as main speaker to the

5th Miniworkshop on Operator Theoretic Aspects of Ergodic Theory

at Tübingen University, see the attached poster. In order to start some joint research we would be glad if you could come before the workshop, hopefully around November 15th.

We can cover all your local expenses and contribute to your travel expenses.

Looking forward to meeting you soon.

Prof. Rainer Nagel
